

13th European Decision Sciences Conference

<https://edsi.decisionsciences.org/conference>

Building resilience for sustainable transition

The necessity for the development of new business models to combat the looming energy crisis, to prepare for the digital disruption, to improve supply chain transparency and security, to ensure diversity and inclusion, mental health and physical wellbeing in workplaces, generate a challenging new environment for managers across all the functional areas of an organisation. With increased risks along the supply chain, building resilience has become a pivotal topic for sustained organizational survival and growth. The conference will provide a forum for academics as well as practitioners to present research papers and discuss opportunities to improve effectiveness and innovation in organisations. The underlying intent will be to generate insights into the radical changes and develop innovative decision making models for responsible organizational performance.

Conference Chair

Professor Mihalís Giannakis

Local Organizing Committee

Professor Rhona Johnsen
Professor Thomas Johnsen
Dr Konstantina Spanaki
Dr Leonardo Marques
Dr Jean-Mark Charlot
Ms Alice Anohan

Call for Papers

English is the official language of the conference. All submissions should be made electronically. We welcome abstract, paper and poster submissions. Prospective authors are invited to submit original research abstracts / papers / posters (NOT submitted or published or under consideration anywhere in other conferences/journals).

Presentations at the conference will be based on submission and acceptance of an abstract (up to 250 words). Following abstract acceptance, delegates will have the option to submit a full paper, addressing the review comments.

Alternatively, you can submit a poster to our poster session. If you choose to submit a poster, an abstract should be submitted using our submission system.

All accepted abstracts and papers will be available in the Conference Proceedings.

Topics

EDSI 2023 invites contributions from across all the disciplines relevant to the decision sciences, including analytics, modelling, and qualitative studies. Topics include but are not limited to:

- Accounting, financial, and marketing decision making in organizations.
- Business Analytics
- Behavioural Operations
- Blockchain Technology
- Cyber Security and System Resilience
- Decision Making in Public Organizations

Workshops/Special Tracks

The Conference offers the opportunity to provide a limited number of professional development workshops and/or special tracks. These should be relevant to the core theme of the conference and intended to help delegates improve their skills. Please send your suggestions to edsj2023@audencia.com

Best Paper Awards

Two best paper prizes will be awarded – one for the best theory-oriented paper and one for the best applications-oriented paper presented at the conference. Prizes will also be awarded for the best PhD student presentation and best poster. Note that papers can only be submitted to one prize category. Evaluation: The EDSI Board will convene the best papers nomination panel.
